Cement industry has been always among the largest CO<sub>2</sub> emission sources. Almost 5–7% of global CO<sub>2</sub> emissions are caused by cement plants, while 900 kg CO<sub>2</sub> is emitted to the atmosphere for producing one ton of cement. In this work, global strategies and potentials toward mitigation of CO<sub>2</sub> emissions in cement plant have been discussed and the most promising approaches have been introduced.

Abstract: Engine is the heart of aircraft, which makes other systems dependent on it for their proper function. This arises the situation to use an engine with high efficiency and reliability. In spite of all other types of engine, Gas turbine engine is the best suited one for modern transportation.
