a visual language for pdf

In computing, a visual programming language (VPL) is any programming language that lets users create programs by manipulating program elements graphically rather than by specifying them textually. A VPL allows programming with visual expressions, spatial arrangements of text and graphic symbols, used either as elements of syntax or secondary notation. For example, many VPLs (known as dataflow ...

Visual brand language is the unique "alphabet" of design elements – such as shape, color, materials, finish, typography and composition – which directly and subliminally communicate a company's values and personality through compelling imagery and design style. This "alphabet", properly designed, results in an emotional connection between the brand and the consumer.
