articles on recycling including pdf

Recycling is the process of converting waste materials into new materials and objects. It is an alternative to "conventional" waste disposal that can save material and help lower greenhouse gas emissions. Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby reducing: energy usage, air pollution (from incineration), and water ...

Recycling - Wikipedia

The Vermont Department of Environmental Conservation's mission is to preserve, enhance, restore and conserve Vermont's natural resources and protect human health for the benefit of this and future generations.

Welcome to DEC | Department of Environmental Conservation

Plastic recycling is the process of recovering scrap or waste plastic and reprocessing the material into useful products. Since the vast majority of plastic is non-biodegradable, recycling is a part of global efforts to reduce plastic in the waste stream, especially the approximately 8 million tons of waste plastic that enters the Earth's ocean every year.

The following nationwide resources are provided by Officiency to assist companies and families with recycling

and donation of unwanted goods. A listing of general and specific resources to donate and recycle.

Recycling and Donation Resources - Nationwide Listings

1. Introduction. Recycling, per se, is not inherently good or bad. For some materials such as glass, the benefits are dubious and depend on factors like the shipping distance. There has been some debate about the benefits from recycling primary alkaline batteries over simple disposal because the materials are abundant and non-toxic, now that the batteries no longer contain mercury.

The future of automotive lithium-ion battery recycling

PET and PET variants resins which have a crystalline melting point between 225 and 255C are preferred. Materials of a lower melt point or non-crystalline materials often become sticky in the reclaimers'™ pre-extrusion dryer when the dryer is operated at PET temperatures and prevent the material from flowing through the process.
