Clinical trials are experiments or observations done in clinical research. Such prospective biomedical or behavioral research studies on human participants are designed to answer specific questions about biomedical or behavioral interventions, including new treatments (such as novel vaccines, drugs, dietary choices, dietary supplements, and medical devices) and known interventions that warrant ...

Metagenomics is the study of genetic material recovered directly from environmental samples. The broad field may also be referred to as environmental genomics, ecogenomics or community genomics. While traditional microbiology and microbial genome sequencing and genomics rely upon cultivated clonal cultures, early environmental gene sequencing cloned specific genes (often the 16S rRNA gene) to ...

Tools. Investigators are strongly encouraged to consult with the Study Design and Biostatistics Core, which provides FREE consultations to those planning to conduct or currently conducting clinical or translational research. Drop-in sessions for study design and statistical analysis consultation are held every Tuesday, from 11 am â€“ 12 pm.

], dideoxynucleotide sequencing of DNA has undergone a steady metamorphosis from a cottage industry into a large-scale production enterprise that requires a specialized and devoted infrastructure of robotics, bioinformatics, computer databases and instrumentation.

### **The impact of next-generation sequencing technology on**

At the moment, a number of NGS platforms are available. The most important properties of several NGS platforms, such as output and fragment length, are presented in Table 1 (Bertelli and Greub, 2013, Dark, 2013, Junemann et al., 2013, Loman et al., 2012). The different NGS platforms use different sequencing technologies.

Care, Speed, and Accuracy We handle samples with care and appropriate speed to obtain the most informative and accurate result. We collect and utilize descriptive information imparted with that sample (address, age, breed, sex, history) in ways that reveal the useful and pertinent context for the diseases we study without divulging information in any way that might insult or harm the animal ...
